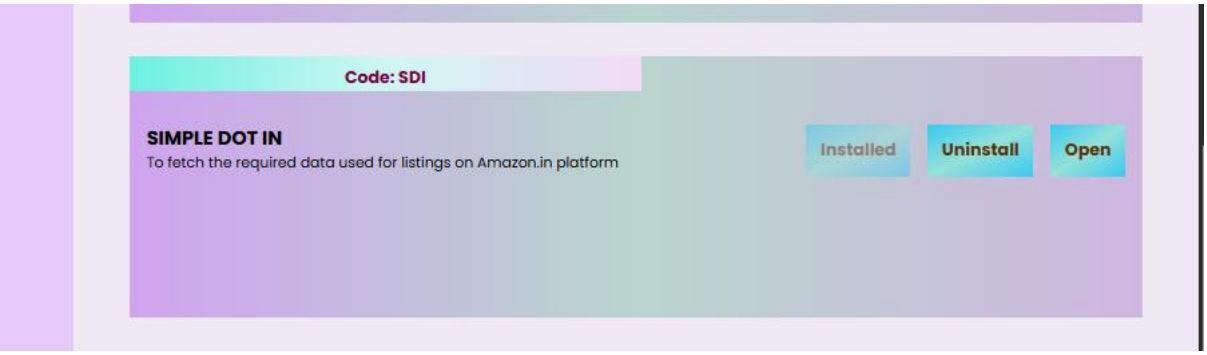
SIMPLE DOT IN

To fetch the required data used for listings on Amazon.in platform, first open **OneApp** and install the Simple Dot IN program. Once installed, launch it and you'll see input fields where you can paste your data. In the first field, enter your option: type 1 if you want full product data (all details such as brand, price, seller rating, Prime eligibility, and restriction status) or type 2 if you want filtered data (only the compliance summary showing allowed or restricted products, seller, and price). On the next line, paste your list of ASINs, then click **Submit**. The program will run automatically, checking restrictions, fetching product details, and organizing the results. When it completes, go to the **Output Page** and click to view the results. The output will open directly in an Excel file, showing the product information according to the option you selected, with restricted products highlighted for easy identification.

WORKFLOW:

1. Install and Open the Program

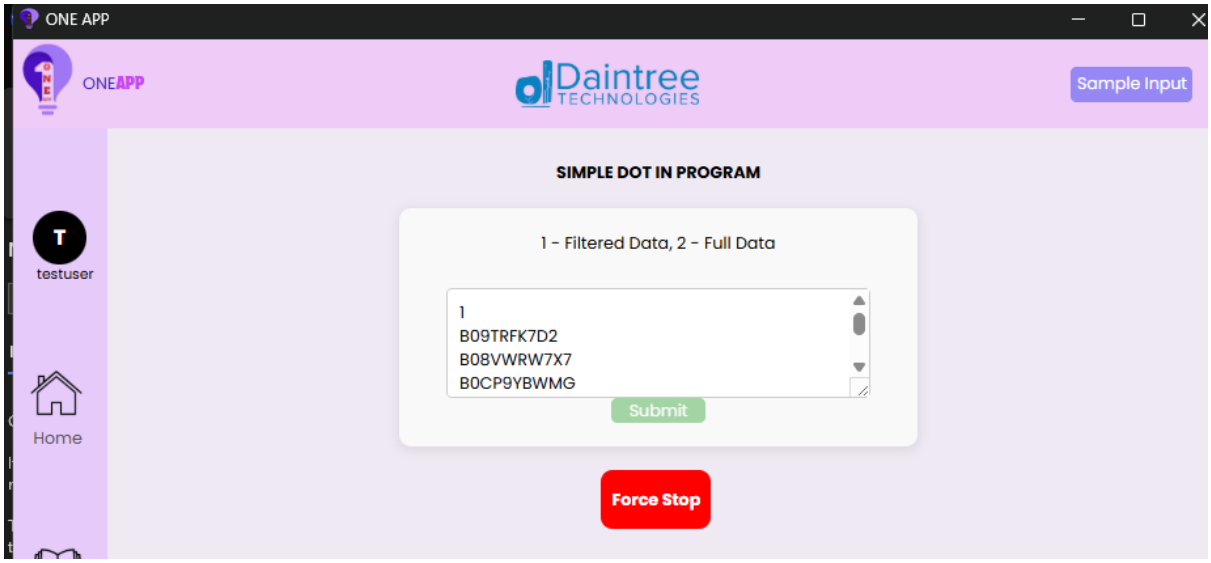
- Open OneApp on your system.
- Install the Simple Dot IN program.
- Once installed, open the program.



---

2. Enter Your Inputs

- In the program window, you'll see input fields.
- First, choose your option:
  - Type 1 → Full Data (shows all product details).
  - Type 2 → Filtered Data (shows only compliance summary).
- On the next line, paste your list of ASINs (Amazon product IDs).
- Click Submit.



---

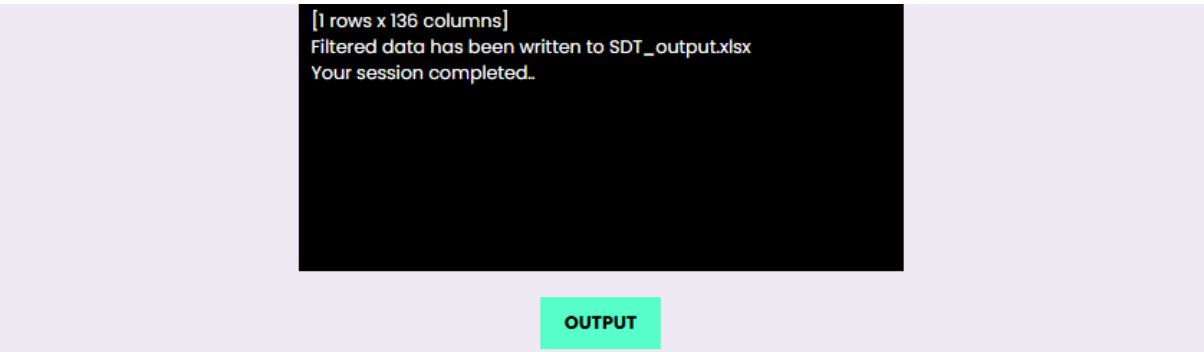
3. Program Execution

- The program will automatically process your ASINs.
- It checks restrictions, fetches product details, and organizes the results.
- You don't need to do anything while it runs — just wait until it completes.

---

4. View the Output

- After completion, click on the output button.
- The results will open directly in an Excel file.



---

5. Understanding the Excel File

- The file contains product details based on your chosen option.
- **Full Data mode:** All attributes (brand, price, seller rating, Prime eligibility, restriction status).
- **Filtered Data mode:** Only compliance summary (allowed/restricted, seller, price).

- Restricted products may be highlighted for easy identification.
