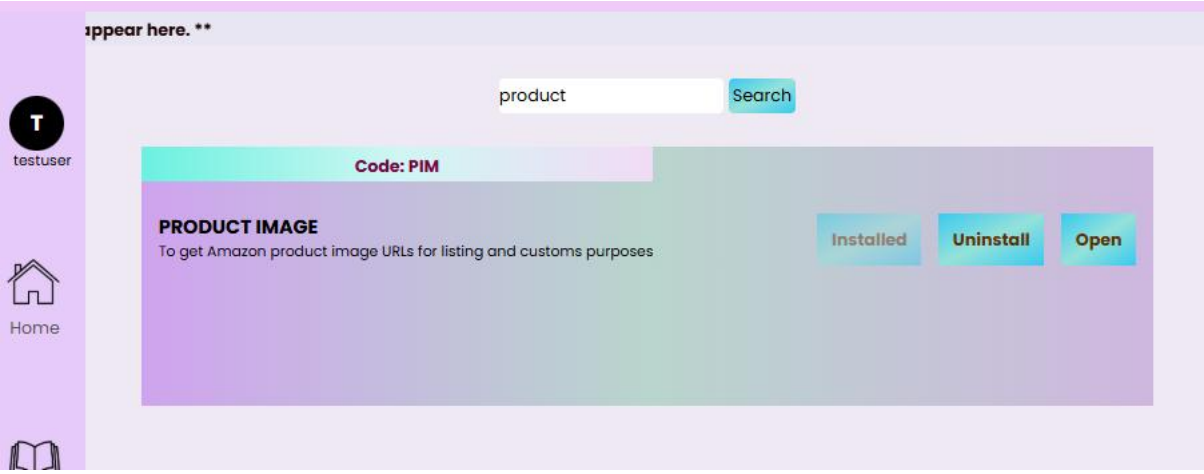
PRODUCT IMAGE

To get Amazon product image URLs for listing and customs purposes, first open **OneApp** and install the **Product image** program. Once installed, launch it and you'll see input fields where you can paste your ASINs. Simply paste your list of ASINs into the input field and click **Submit**. The program will then run automatically, fetching the product image details from Amazon. It collects the image URLs along with their variants, marketplace IDs, heights, and. When the execution is complete, click the output button. The results will open directly in an **Excel file**, where you'll see the data organized into columns. This Excel file provides a clear, structured view of all product images linked to each ASIN, making it easy to review and analyze the visual data.

WORKFLOW:

1. Install and Open the Program

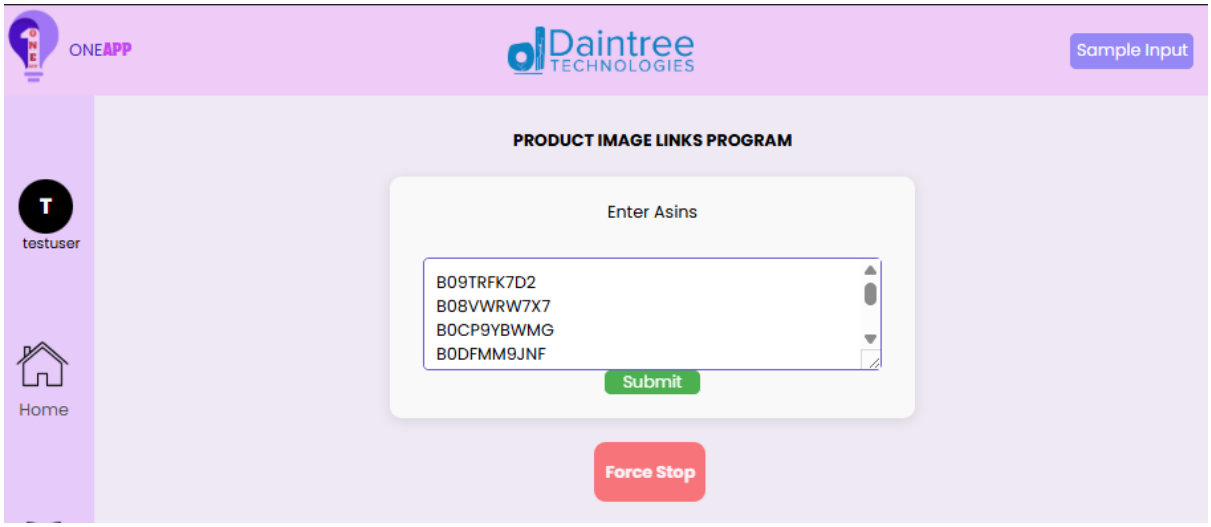
- Open OneApp on your system.
- Install the Product image program.
- Launch the program after installation.



---

2. Enter Your Inputs

- In the program window, paste your list of ASINs (Amazon product IDs).
- Click Submit.



---

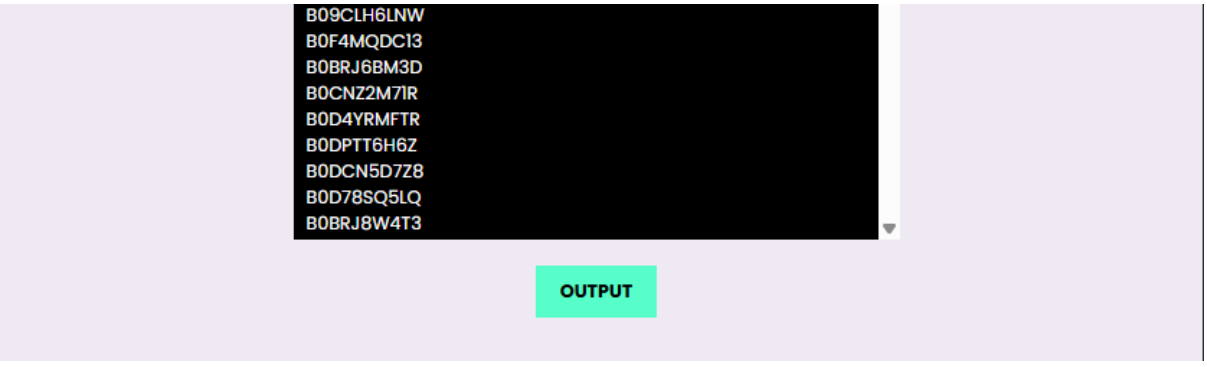
3. Program Execution

- The program automatically processes each ASIN.
- It fetches product image details including:
  - Image URLs (front view, back view, additional product images).
  - Marketplace ID.
  - Image variant (main, thumbnail, alternate).
  - Image height and width.
- All data is cleaned and structured internally.

---

4. View the Output

- Once execution is complete, click the Output button.
- The program opens an Excel file containing the results.



---

5. Understanding the Excel File

- This file contains ASIN’s with it’s image url’s and there height and width of of each image is organized in a excel file.
