LISTING RESTRICTIONS CHECKER

The Listing Restrictions Checker program is used to verify whether multiple ASINs are eligible for selling on Amazon. The tool checks selling eligibility and restrictions in bulk and provides detailed results for each ASIN.

First, users must prepare a text file named inputs.txt. In this file, enter each ASIN on a separate line without adding extra spaces before or after the ASIN.

After preparing the input file, run the Listing_Restrictions_Checker tool. The program processes all ASINs and checks their selling eligibility on Amazon.

Once the program finishes execution, it generates an Excel file named LRC_Output.xlsx.

Open the Excel file to view the results. The file contains detailed messages explaining whether the ASIN is eligible for selling or restricted.

To identify eligible ASINs, apply a filter to the Message column in Excel and search for the phrases:

"Apply to sell"

"Sell this product"

The ASINs displayed after filtering are the approved and eligible ASINs that can be used.

The tool is optimized for bulk processing and saves a significant amount of manual effort. The processing time depends on the number of ASINs. Typically, it takes about 1 minute for 10 ASINs and around 3 minutes for 100 ASINs.

Step 1: Prepare Input Asins

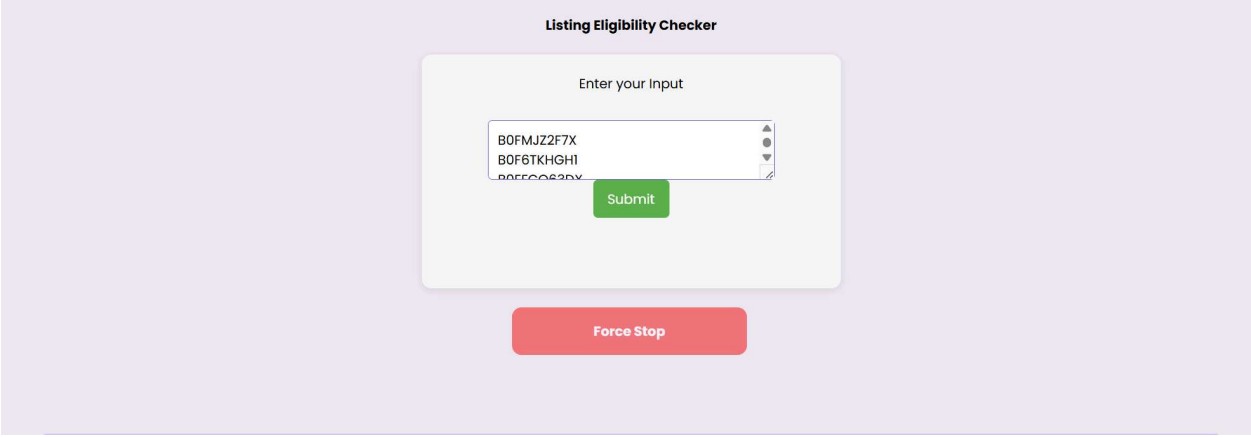
Put all your asins in one app listing_restriction_checker program input place.

Enter the ASINs in the following format:

- One ASIN per line
- Do not add extra spaces

Example:

B0DRWP9CPK
B0ABC12345
B09XYZ6789



Step 2: Program Setup

Open the **Listing_Restrictions_Checker tool**.

Ensure the required **inputs.txt** file is placed in the correct folder.

Run the program.

Step 3: Program Execution

The tool processes each ASIN from the **inputs.txt** file.

It checks the selling eligibility and restrictions for each product.

Processing time depends on the number of ASINs.

Example processing time:

- 10 ASINs → ~1 minute
- 100 ASINs → ~3 minutes

Step 4: Output

After the process is completed, the program generates an Excel file.

Output file name:

LRC_Output.xlsx

Open the Excel file to view the results.

The file contains detailed messages for each ASIN.

To identify eligible ASINs:

1. Select the heading row.
2. Apply an **Excel filter**.
3. Go to the **Message column**.
4. Use **Text Filter**.
5. Search for:

Apply to sell
Sell this product

The filtered ASINs are **eligible for selling**.

Example:
Output file_name: LRC_Output.xlsx
