Asin_Variants

The **ASIN Variants program** is used to identify **product variations using parent ASINs.** The tool reads parent ASINs from a text file and extracts all associated **child ASINs** that belong to each parent product.

First, users must create a text file named **inputs.txt**. In this file, enter each **parent ASIN on a separate line** without adding extra spaces.

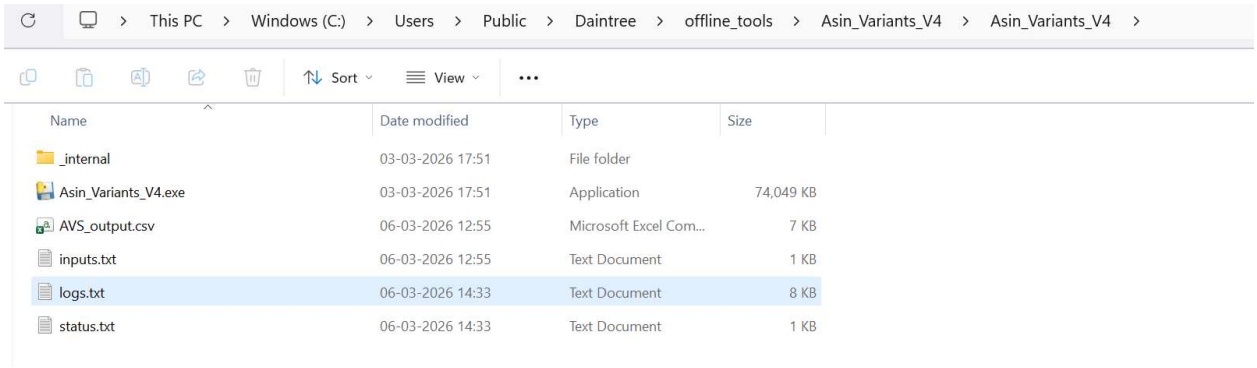
After preparing the input file, run the **Asin_Variants_V4** tool. The program processes the parent ASINs and retrieves complete variation information.

Once the program finishes execution, it generates an output file named **AVS_output.csv.**

The output file clearly maps **each parent ASIN to its corresponding child ASINs**, allowing users to quickly understand the product variation structure.

The tool supports **bulk processing**, which significantly reduces manual work when dealing with multiple ASINs. The processing time depends on the number of ASINs provided. On average, the tool takes **about 1 minute for 10 ASINs**, and the processing time increases efficiently for larger inputs.

ASIN Variants Workflow



Step 1: Prepare Input File

Create a text file named **inputs.txt.**

Enter the **parent ASINs** in the following format:

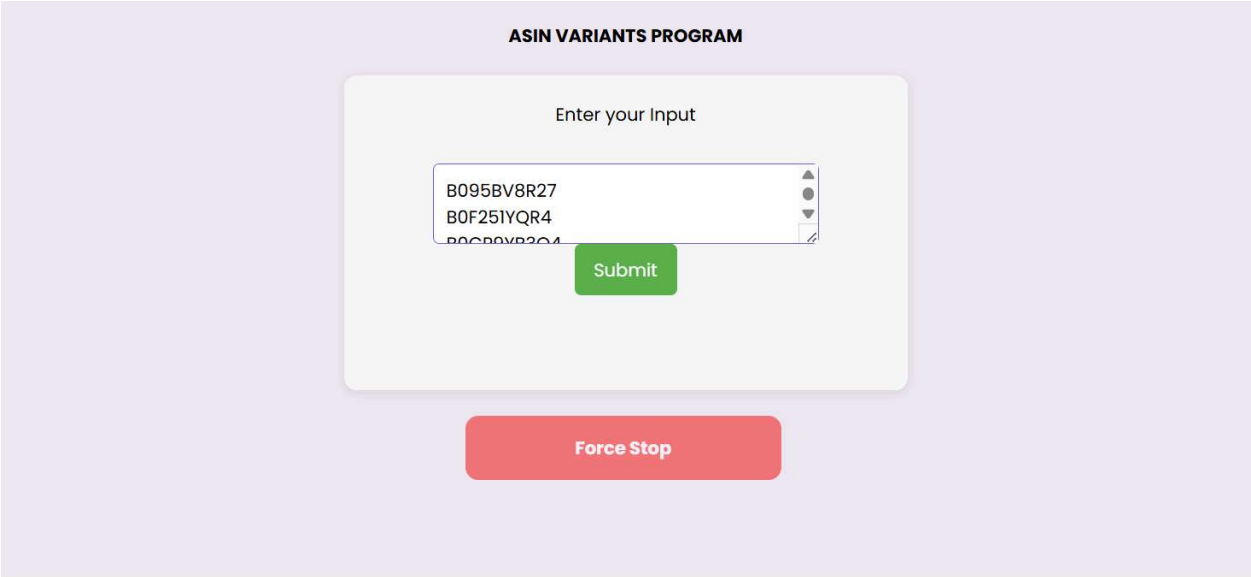
- One ASIN per line
- Do not include extra spaces

Example:

B0DRWP9CPK

B0ABC12345

B09XYZ6789



Step 2: Program Setup

Open the **Asin_Variants tool folder.**

Tool name:

Asin_Variants_V4

Ensure the required **inputs.txt** file is placed in the correct folder.

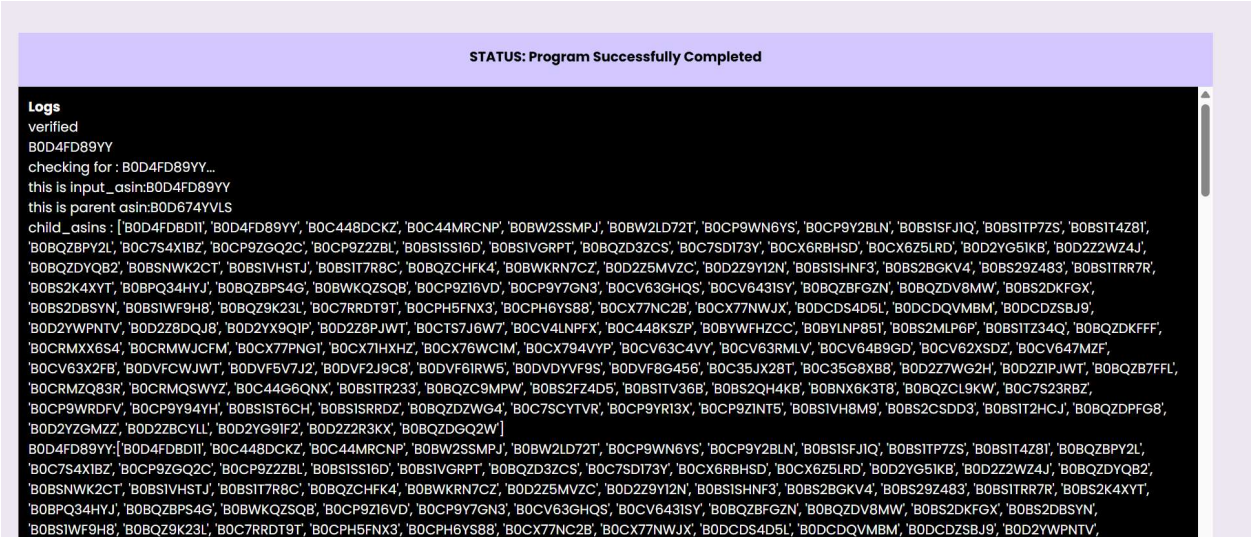
Run the program.

Step 3: Program Execution

After running the program:

- Click the **Submit** button.
- The tool begins processing the parent ASINs.
- The program extracts all **child ASINs associated with each parent ASIN.**

Wait until the status shows **Program Successfully Completed.**



Step 4: Output

After the process is completed:

- Click the **Output** button.

The program generates an output file.

Output file name:

AVS_output.csv

	A	B	C	D	E	F	G	H	I	J	K	L	M
1	ASINS	Child Asin 1	Child Asin 2	Child Asin 3	Child Asin 4	Child Asin	Child Asin	Child Asin	Child Asin	Child Asin	Child Asin	Child Asin	Child Asin
2	B0F251YQR4	B0F2535L3V	B0D4FFXMHP	B0BSLY9M4G	B0BSLVNK1N	B0BSLY2X:	B0F4XKBP	B0DR9NT1	B0CVS147	B0DR9NZN	B0FNLZWT	B0DR9Q6)	B0DH8JW)
3	B0CP9YB3Q4	B0DM5XRQDG	B0DM5TBKM8	B0DM5TFFM2	B0DM5XBNXG	B0DQY9HI	B0DQY7C:	B0G77SVP	B0G78P8Z	B0DQY78(	B0G77185	B0FB7KNN	B0DRLDPN
4	B095BV8R27	B0B5TQKFG2	B0GHCSTKFG	B0BGR6N3YM	B0DPWX48MH	B0B5TX9L	B0B5TYSX:	B0B5TQ5B	B0DN9H6J	B0B5TRFS	B0CPLT18	B0CD1TZB	
5													
6													
7													
8													
9													
10													
11													
12													
13													

Open the CSV file to view the results.

The output file contains:

- Parent ASINs
- Corresponding Child ASINs
- Variation mapping information

This makes it easy to understand **product variation relationships** between parent and child ASINs.
