BULK PDF MERGER

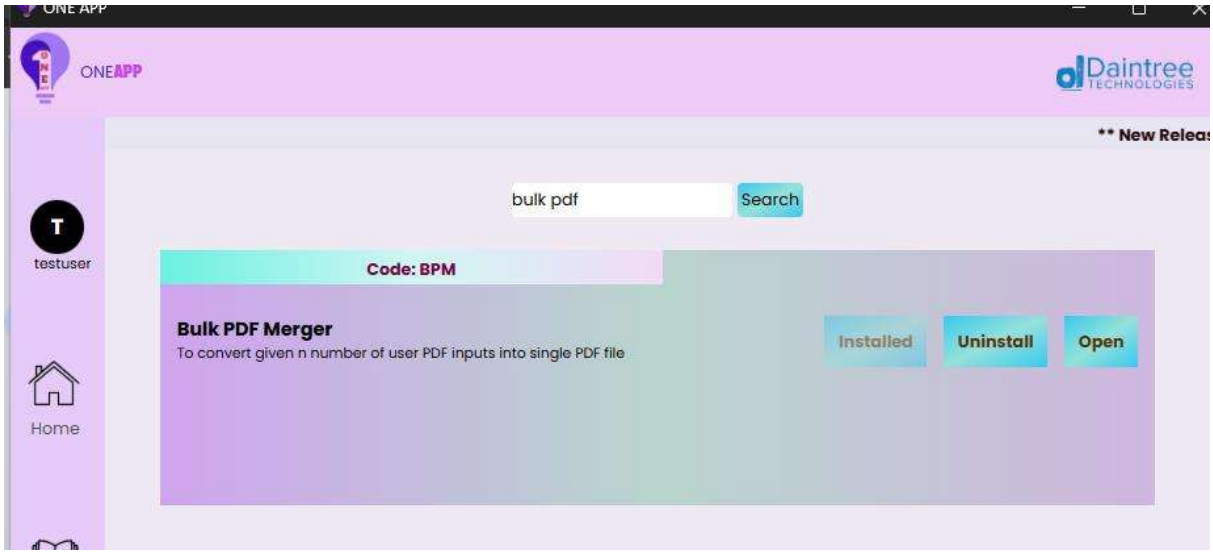
To merge multiple PDF files stored in a folder, first open **OneApp** and install the **Bulk PDF Merger** program. Once installed, launch it and you'll see an input field where you can enter the folder location. After entering the folder path, click **Submit**. The program will automatically merge all PDFs in that folder into a single file. When the process completes, click the **Output** button. The merged PDF will be saved in the Reports folder, named with the **current date and time** followed by the .pdf extension.

WORKFLOW:

How to Use the Bulk PDF Merger

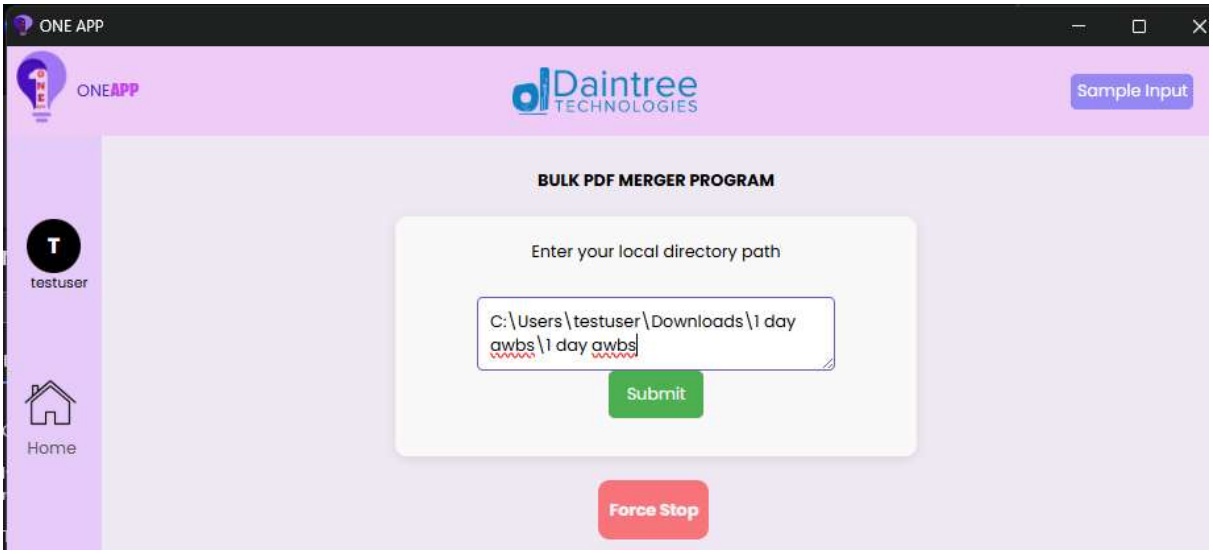
1. Install and Open the Program

- Open **OneApp** on your system.
- Install the **Bulk PDF Merger** program.
- Once installed, launch the program.



2. Enter Your Input

- In the program window, locate the input field.
- Enter the **folder location** containing the PDF files.
- Click **Submit**.



3. Program Execution

- The program will automatically merge all PDF files in the folder.
- No manual action is required while it runs — just wait until it completes.

4. View the Output

- After completion, click the **Output** button.
- The merged file will be saved in the Reports folder.
- In the location - C:\Users\Public\Daintree\offline_tools\PDF_merger_v5\PDF_merger_v5\Reports
