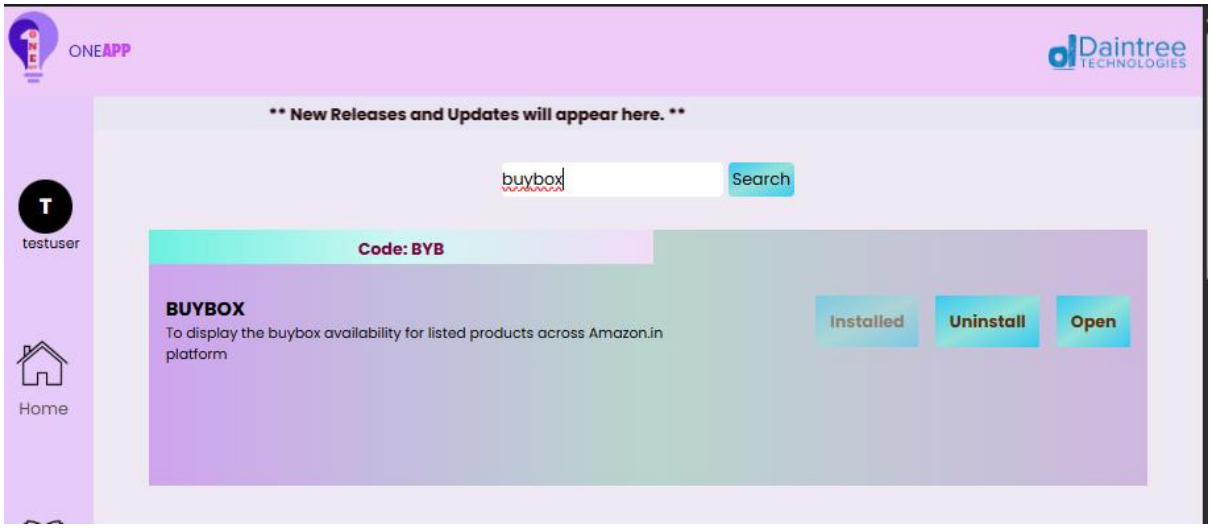
Buybox

To display the buybox availability for listed products across Amazon.in platform. First, open **OneApp** and install the **Buybox Program**. Once installed, launch it and paste your list of ASINs in the input field. Then click submit button, the program will then fetch product offers from Amazon Seller Central, analyze Buybox eligibility, and log the results. The output is stored in the Excel sheet, showing whether your seller account holds the Buybox for each ASIN.

WORKFLOW:

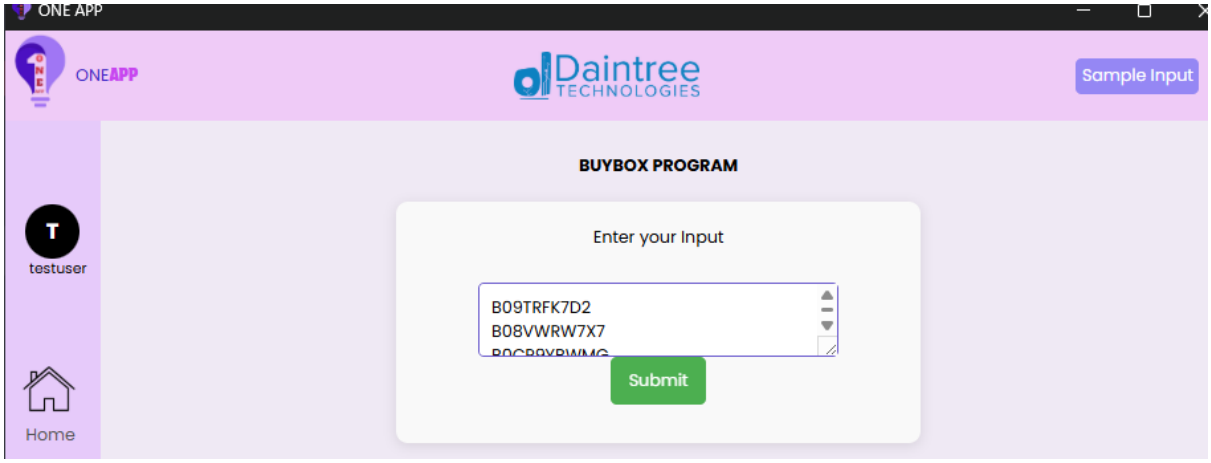
1. Install and Launch the Program

- Open OneApp on your computer.
- Install the Buybox Program if it's not already installed.
- Launch the program to begin.



2. Provide Your ASINs

- In the program window, you'll see an input field.
- Paste your list of ASINs (Amazon product IDs) into this field.
- Click the Submit button to start the process.

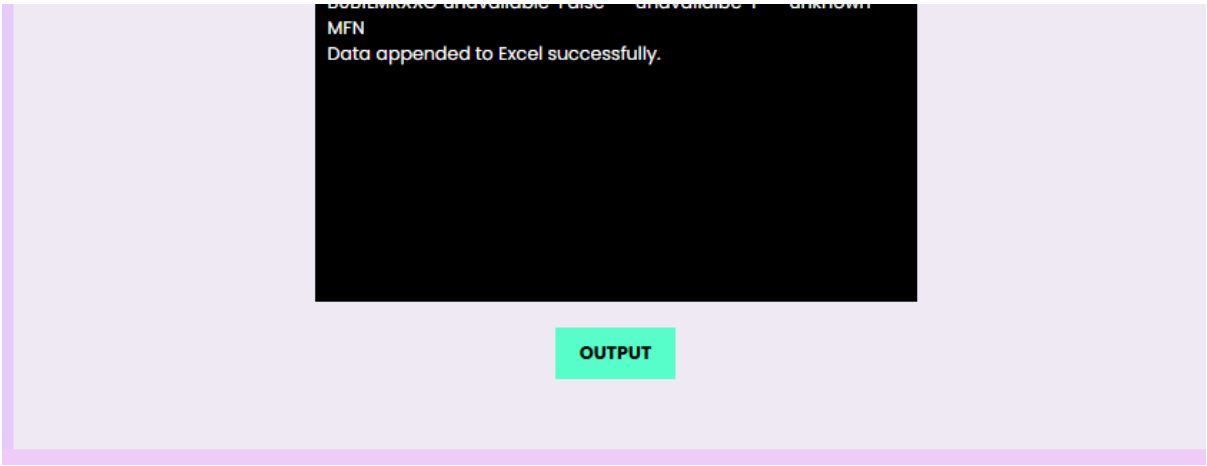


3. Program Execution

- The program connects to Amazon Seller Central and fetches product offer details for each ASIN you entered.
- It analyzes the data to check:
  - The current price of the product.
  - Whether your seller account is the Buybox winner (True/False).
  - The prices of other sellers offering the same product.
  - The number of sellers competing for that ASIN.
  - The seller ID or name of the Buybox winner.

4. View the Results

- Once the program finishes, click the output Button in the page. It automatically creates or updates an Excel file called New_BYB_output.xlsx.
- Each ASIN you entered will have a row in the Excel sheet with the following details:
  - ASIN
  - Price
  - Buybox status (True/False)
  - Other seller price
  - Seller count
  - Seller ID / Seller name
  - Timestamp (date and time when the check was done)



5. Understanding the Output

- If your seller account is the Buybox winner, it will be clearly marked as True in the Buybox status column.
- If another seller holds the Buybox, you'll see their price and seller ID listed.
- This makes it easy to compare your offer against competitors and adjust your pricing or strategy.

Why This BuyBox program:

- Winning the Buybox is critical for sales success on Amazon.
- This program gives you a clear, organized way to monitor Buybox status for multiple ASINs at once.
- With the Excel output, you can track changes over time and make informed decisions about pricing, fulfillment, and competition.
