KEYWORD

Keyword program is used to scrape the data in the amazon.com website with our keyword. First, we need to check the keyword in the amazon.com enter the keyword in the search bar. Then check the result if the result is correct, you can use the keyword. Or else enter the correct keyword in the search bar and submit it if the result is correct. Copy the keyword and open the ONEAPP and install the keyword program .if already installed no need to install again. Open the tool and enter the keyword that you copied in the input tab then submit it.

This program will opens a chrome window. You can see it in the task manager .Don't open it just wait for the **STATUS: Program Successfully Completed** then click on the output button it will redirects to the excel sheet .

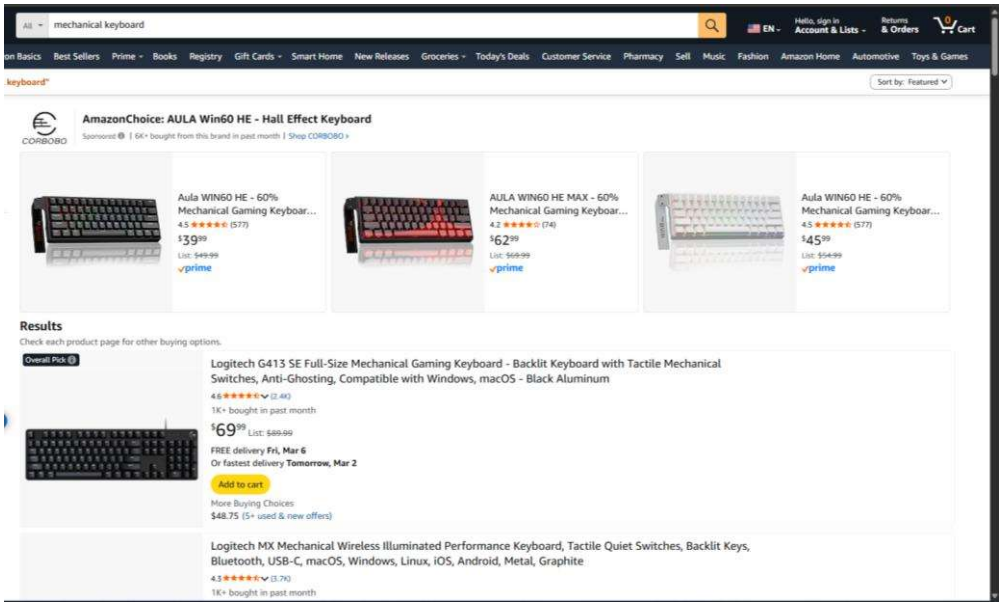
KWD_output.xlsx is the name of the excel sheet

Open the sheet and you will see the data with column names

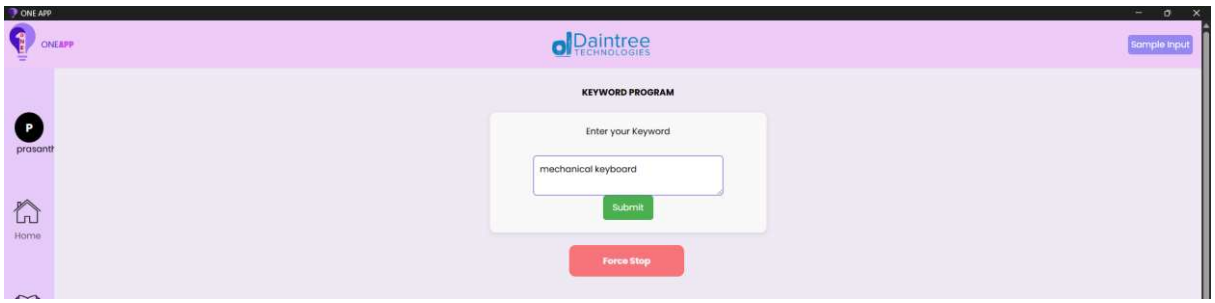
ASINS, LINKS ,TITLES, RATINGS, REVIEWS, PRICE

Keyword Program Workflow

- **Step 1: Keyword Validation**
    - Go to **amazon.com**.
    - Enter your keyword in the search bar.
    - Check if the search results are correct.
    - If not, adjust the keyword until the results match your intent.
    - Copy the correct keyword.



- **Step 2: Program Setup**
  - Open **ONEAPP**.
  - Install the **Keyword Program** (skip if already installed).
  - Launch the tool and paste the copied keyword into the input tab.
  - Submit the keyword.



- **Step 3: Program Execution**
  - A Chrome window opens in the background (visible in Task Manager).
  - Do not interact with it; wait until the status shows **"Program Successfully Completed ."**

- **Step 4: Output**

Click the **Output** button.

  - The program generates an Excel file named **KWD_output.xlsx**.
  - Open the file to view scraped data with columns:

- **ASINS**
- **LINKS**
- **TITLES**
- **RATINGS**
- **REVIEWS**
- **PRICE**
